LO 0907 Law of Forensic Science :

Objectives of the Course : Forensic science plays a very important role in criminal law justice system. It helps in determination of the guilt of a suspected criminal, and ascertains various facts in a case by scientifically testing various types of evidences collected during criminal investigation. A Prosecutor or a Judge is an expert in the field of law but may lack in-depth scientific knowledge, which may be necessary in different cases to ascertain the facts and circumstances of the case in order to prove the case “beyond reasonable doubts” and to attribute criminal liability to the accused person. Therefore, expert opinion of scientists and doctors are invited by the courts whenever evidences are scientifically examined.

The aim of this course is to explain the concept of forensic science and its role in criminal law. This course will give an overview as to what kind of evidences are collected and scientifically tested in various crimes, how the result of these tests and expert opinion are useful in investigations and trials and its evidentiary value.
